The Construction Specifications Institute

Pikes Peak Chapter CSI October Chapter Meeting Commercial Fire-Rated Aluminum Glazing Systems

This presentation will help educate the architect about alternative fire-rated window, door, and vision or glass wall materials currently available in commercial construction. The course will illustrate how a group of specialty glazing systems is gaining increasing popularity by answering two important architectural design needs: the requirement to establish code mandated life safety in a building versus the need to provide transparency, daylighting, aesthetics, and overall value for occupants and building owners. At the convergence of these opposing building design requirements are fire-rated aluminum glazing systems – a technology that has evolved from 100 years of experience with glass products for fire protection use.

The learning unit will summarize the history of this evolution and compare some of the different designs that are available to the architect today. It will also explore examples of how fire-rated aluminum glazing systems can be incorporated while addressing some of the common code considerations.

Credit(s) earned on completion of this course will be reported to AIA CES for AIA members. Certificates of Completion for both AIA members and non-AIA members are available upon request.

COOPERFORM INC
ARCHITECTURAL PRODUCTS

Cooperform has been aligning with architects and construction professionals to integrate design requirements with innovative, practical solutions for more than 20 years.

We provide resources and assistance for our products in both conventional and complex designs.

Date: Wednesday, October 31, 2018
Time: 11:30 a.m. to 1:00 p.m.

The Warehouse

25 W. Cimmaron Street
Colorado Springs, CO 80903

No cost to Pikes Peak Chapter members
Please RSVP at www.pikespeakcsi.org
by noon on
Monday, Oct. 29

Gerry Cooper is President of Cooperform, Inc., an architectural products representation agency providing specialized glass, framing and metal solutions throughout the intermountain region for over 20 years. Serving the design, manufacturing and contracting communities from project conception through completion has been rewarding. Starting out in the architectural skylight business, his experience covers a broad spectrum. Daylight and sun control, decorative, structural, protective and historical glass systems for commercial, educational and institutional applications are a regular focus.

MESSAGE FROM THE PPCSI BOARD

Thank you to Miles Drake from BranchPattern for a great presentation on The Pikes Peak Summit House. What a wonderful project it is shaping up to be!! We also want to make sure to thank our tabletop presenter, Maggie Odell from Benjamin Moore for a very informative presentation .

I'm not sure if you are all aware, but Pikes Peak Community College is celebrating their 50th anniversary this year! We congratulate them! From the days as "Safeway U" with three associate programs, to now being the second largest college in our state system, PPCC has grown so much in the last 50 years.

As you may know, Pikes Peak Chapter CSI sponsors an annual scholarship for students in the A/E/C program at PPCC. The funds for this sponsorship comes from our tabletop presenters throughout the year. We are in need of tabletop sponsors currently. If you are a product representative that is interested in the opportunity to speak to our members and guests, please contact any board member to get details on becoming a tabletop presenter.

Don't forget that each November we have our Toys for Tots drive. Please bring an unwrapped gift for a child— or two if you can to our Chapter Meeting on November 16. These gifts go to children that may not get gifts if not for this wonderful program. We all enjoy seeing our children and grandchildren opening their gifts in delight during the holidays, so please think of these children and give generously so they too can be excited and enjoy this holiday season.

This month we welcome Gerry Cooper from Cooperform, Inc. Please plan to join us for his presentation titled "Commercial Fire-Rated Aluminum Glazing Systems". This is an AIA accredited CEU.

Thank you all for your continued membership and attendance at our meetings. Please be sure to contact any board member if we can be of service.

Don't forget—November is our annual Toys for Tot's drive! This program has been in existence since 1947 and we are proud to continue the tradition of gathering gifts for children that will otherwise not have gifts during the holidays. Please bring a new, unwrapped gift when you come to the November Chapter meeting.
